

Spa/Plunge facility | Closed

Following an extensive investigation into several major maintenance and operational concerns, the decision has been made to permanently close the Spa/Plunge facility.

This decision has been made for a number of reasons:

- The Spa is leaking significant volumes of water, and this spikes when the spa facility is in operation. This presents significant concerns in terms of water and chemical loss and the associated financial implications, and structural damage to the slab. We also hold health-related concerns due to the chlorine concentration becoming diluted as a result of water loss, and the system being unable to maintain the required disinfection rate.
- Due to the age of the facility and other issues related to the condition of the operating plant and electrical sub-board, full replacement would be required at significant cost. A review of usage rates has shown that cost recovery of the required spend is not viable in an appropriate period of time.

For these reasons, the decision has been made to close the facility immediately & we apologise for any inconvenience this may cause.
